

John Tofflemire

ABOUT DIRECTOR TOFFLEMIRE

John Tofflemire is a retired Professional Engineer who spent over 50 years active in Traffic Engineering, Transportation Planning, and Civil / Environmental Engineering positions. After graduation from the University of Waterloo (B.A.Sc. 1974, M.A.Sc. 1976) he spent two years at the City of Halifax and 4 years at the City of Edmonton working on significant municipal transportation projects such as establishing a Regional Transit system in Halifax and planning the extension of the new Light Rail Transit system in Edmonton. In 1981 he moved to the City of Windsor as head of the Traffic Engineering Department, eventually becoming City Engineer and General Manager of Infrastructure Services before moving to the Municipality of Leamington in 2006. During his time in Windsor he was responsible for numerous large Civil and Environmental projects such as the computerization of the traffic signal system, the master planning and environmental assessments to prepare for the construction of the Herb Gray Parkway and the Gordie Howe Bridge, and the design and construction of the West Windsor Pollution Control Plant.

In 2006 he became Director of Community Services for the Municipality of Leamington, responsible for Engineering, Public Works, Parks and Recreation, and Water Supply. Significant projects included the design and construction of the East Side Arterial Road, the Leamington Pollution Control Plant, Seaciff Park, and the Leamington Municipal Marina.

He retired from the public service in 2011 and worked as Manager of the Leamington office of RC Spencer Associates Consulting Engineers until his retirement in 2022, completing over 250 Traffic Impact Studies during that time.

He has been involved at the University of Windsor since 1993 as a sessional instructor and has been an Adjunct Professor in the Department of Civil and Environmental
